About Jabil Software Services

Jabil software services deliver advanced software engineering solutions to a diverse group of industries across multiple domains. This extensive knowledge base allows us to solve complex issues throughout our customer's technology stacks which accelerates their time to market and revenue.

Jabil offers end-to-end, comprehensive engineering capabilities with operations at over 100 sites in 26 countries. As a single point of accountability, we help:

- Innovate and develop designs optimized for performance and manufacturability
- Rapidly prototype for accelerated product introductions
- Manufacture the highest-quality products and components using the latest automation and process technologies
- Stringently validate and test with proprietary, integrated methodologies
- Ensure that customers build in the right location, source the right materials, and reach target markets with intelligent, digital supply-chain solutions

About Jabil

Jabil's unique combination of global expertise, ingenuity, analytics and financial performance has contributed to the success of the world's most well-known brands. We help companies design, build and take their products to market quickly, affordably and effectively. But more than that, Jabil helps customers intelligently design their supply chains to be agile, economical and effective even in uncertain times.

We provide supply chain services to some of the world's most respected and trusted brands in a broad range of industries, including defense, aerospace, automotive, clean technology, computing, consumer, industrial, instrumentation, healthcare, networking, peripherals, storage and telecommunications.
