COMPANION APP BENEFITS

- Faster Time-To-Market
- Intuitive UI/UX
- Reliable & Scalable
- Robust & Secure Architecture

COMPANION APP FEATURES

- Bluetooth & Wi-Fi Device Connectivity
- Access to Order History
- Branding Customization
- Real-Time Order Status Notifications
- Reorder Threshold Customization
- Bring-Your-Own-Bin Calibration
- Monitor Product Usage

COMPANION APP TECHNICAL SPECS

- EOS 102 Encryption
- Match Privacy Policies
- X5 IOS Certified
- Constant Background Testing
- Identity Service and Cloud Agnostic

Companion App
A Branded Consumer Application to Manage Product Auto-Replenishments

Connected Packaging provides an exciting solution to many of the challenges that the world's largest CPGs currently face. Jabil's connected packaging solution combines three key elements: the durable device, the consumable package and the companion app.

The Jabil Connected Packaging Companion App transforms the consumer packaged goods experience by connecting devices to consumers and to the IOT back-end that facilitates seamless reordering of household staples.

When connected to the device, the Companion App notifies consumers when product is running low. Consumers can then approve or delay the replenishment, ensuring that they never run out of product, yet also ensuring that they never have an excess. Convenient. Fast. Easy. No need to prepare grocery lists, manage subscriptions or store items in bulk.

Jabil's Companion App provides multiple customization options to facilitate your branding without the headache of designing, developing and maintaining a bespoke mobile application. Jabil supports the application, constantly testing to ensure reliability, scalability, security and privacy. The clean and simple interface is easy to navigate for end-consumers of all ages and levels of technical ability.

JABIL

# How It Works

| 1	2	3	4	5
Upon download completion, consumers are met with the brand splash screen	The companion app and Cyclops pair via Bluetooth and connect to the consumer's home Wi-Fi network	The consumer then names and calibrates their device by selecting its size	The consumer selects the desired products on the retailer setup page	When product level falls below the reorder threshold, the consumer is notified that new product is on the way

About Jabil Packaging Solutions

At Jabil, we strive to make anything possible and everything better. With over 260,000 diverse, talented and dedicated employees across 100 locations in 30 countries, our vision is to be the most technologically advanced and trusted manufacturing solutions provider. We combine an unmatched breadth and depth of end-market experience, technical and design capabilities, manufacturing know-how, supply chain insights and global product management expertise to enable success for the world's leading brands. We are driven by a common purpose to make a positive impact for each other, our communities and the environment.
